

A cordial greeting to you. Hoping that you are well and that God blesses you in each one of your activities.

I am thankful to God the Almighty for allowing me to advance in my studies. I am very grateful for the people of Our Lady of the Presentation Church for the opportunity you have given me unconditionally in order to continue my career as a Bachelor of Public Accounting.

Over the years I have realized that in life, it is not only intelligence that plays an important role, but rather a set of principles that must be put into practice in order to achieve our goals. Thanks to CIS and all those who make financial aid possible and for the training that is provided for us in each of the activities.

At first, I thought that I would not finish my university studies, but with effort I have managed to reach the fifth year of the undergraduate degree in public accounting. When I was barely in high school my tendencies were in the career of business administration, but then I decided to study public accounting. It has not been easy at all, since many times, to get good grades, not only good physical health is required, but rather good mental health and learning ways of handling different situations of daily life.

In the future I would like to specialize in the forensic audit area, or the tax area. Like every student, I have had my failures, and I have fallen, but the support from the members of Our Lady of the presentation, I have been motivated to continue.

I am currently studying in my fifth year and at the same time I have taken English classes offered through CIS and the Melida Anaya Montes English School.

I would like to continue with my higher studies, but it is difficult for me, since in the course of my studies my daughter was born. Her name is Sofia.

In order to get ahead and face the decisions I have made, I decided to learn how to cut men's hair. At first I had many limitations, but little by little I became known. I did not go to any school to learn. I learned through youtube videos. At first it was difficult for me to do the fade, since nobody guided me, nor told me the mistakes I made. But with the passing of the days, I improved.

Currently I stopped because, my studies demands reading different books such as NIAS, customs laws, tax laws, forensic audit texts, etc.

Another of my achievements has been to start a business personally. The business is small. It consists of laying hens that I financed with what my hairstyling business generates. My goal is to have a poultry business and generates employment.

At a family level, it means working and being able to have a decent home for my daughter and my daughter's mother. For family goals, we are committed to raising our daughter and forming her with values and principles that contribute to improving society.

May God bless you greatly.

-Alex
